João Luiz Vieira

FRONT END DEVELOPER & UI/UX DESIGNER

Hybrid developer bridging the gap between **engineering and design** — I build interfaces that are technically solid and visually compelling. My background in both front-end development and UI/UX allows me to **own the full journey from wireframe to production**, reducing handoff friction and shipping faster. I'm driven by clean code, design fidelity, and experiences that users actually enjoy using.

Experience

Sizebay — CURRENT
Jan 2025 — Present

TECHNICAL SUPPORT & INTEGRATION ANALYST

→ Lead process analysis and implementation of improvements across multiple squads, going beyond team boundaries to drive cross-functional optimization.

→ Own end-to-end product integration flows and serve as a key technical reference for the integration team.

→ Design and implement process automation and tooling enhancements that reduce manual effort and improve reliability.

Sizebay
Jun 2024 — Jan 2025

DEVELOPMENT & INTEGRATION INTERN

→ Performed client-facing product integrations, ensuring seamless onboarding and technical compatibility.

→ Provided direct technical support on product functionality, quickly diagnosing and resolving issues.

→ Proactively identified recurring pain points and contributed solutions, earning promotion to Analyst in under 7 months.

A1Hub / Abecker Loteamentos
May 2023 — Jun 2024

COMMUNICATION & MARKETING INTERN

→ Managed and produced content for company social media channels, maintaining a consistent brand voice and visual identity.

→ Designed marketing collateral and internal communication materials using the Adobe Suite, aligning visual assets with strategic campaigns.

Erzinger Indústria Mecânica
Aug 2021 — Sep 2022

ENGINEERING INTERN

→ Designed UI screens and implemented front-end code for an industrial process monitoring application — first professional experience combining design and development.

→ Translated complex engineering data into clear, operator-friendly interfaces for production floor usage.
